

Conserve Water Today!

Join the Sonoma County Water Agency in conserving water in your yard and home today. Below are some tips to help you conserve water:

- **Purchase a front-load washing machine that uses 40% less water. Check with your local water provider for rebates.**
- **Water early in the morning, avoid watering during the heat of the day when water evaporates more quickly, or when it's windy. Set automatic timers to water before 6 a.m. or after 9 p.m.**
- **Get to know your water meter. It is an important conservation tool that not only measures the amount of water you use, but can also tell you if there is a leak in your plumbing.**

And more – visit www.sonomacountywater.org to learn more about water conservation programs and rebates available through your local water supplier.
